Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 4, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Cherry (1677130).

Cherry shows an elongate sill panel assembly including end members (18, 20) each having a moisture discharge channel (the corrugations) formed therein inclined to the horizontal (the orientation of the channels are inclined to the horizontal), and a horizontal surface, a center section (19) in surfacial engagement with each of the end members and having a horizontal surface coplanar with the horizontal surface of each end members, each of the end members having a forwardly disposed flange (27) defining a channel contiguous with the moisture discharge of the end member, the end members slidably engages the center section at the sides thereof, the sides of the end members in surfacial contact with the center member.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cherry (1677130) in view of Orth (4937991)

Cherry shows all the claimed limitations except for the end members each having a segment of reduced wall thickness in surfacial contact with the center section.

Orth shows members connecting to each other at the sides with sides having a segment of reduced wall thickness to allow for slidable joining of the members.

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Cherry's structure to show the end members each having a segment of reduced wall thickness as taught by Orth in surfacial contact with the center section because forming a joint between end members and a center member with corrugated surface is functionally equivalent to joining end members having reduced thickness at the joints to the center member as they both function the same forming joints between members, and allow for the change in length of the assembly.

Response to Arguments

5. Applicant's arguments with respect to claims 4-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different sill pan assembly.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
